

FAASTeam presents:

Commercial Small Unmanned Aircraft System Operations

A new era of aviation has been ushered in with the recent Small Unmanned Aircraft System Operations (sUAS) regulations – known as Part 107. It is now relatively simple and legal to operate a sUAS within the National Airspace System (NAS) for commercial purposes. Exciting and expanding areas of sUAS operations includes construction management, infrastructure inspection, agriculture, cinematography, real estate, research and development and many others.

This seminar will discuss the steps to earn the new Remote Pilot Airman certificate, Part 107 regulations, sUAS ground and flight training, flight hardware, commercial growth projections, safety management, and weather considerations. A special emphasis will be placed on describing today's commercially viable applications of unmanned aircraft. Come and join us for this informative seminar at the dawn of a new era in aviation.

Do not miss this informative seminar!

Directions: Seminar will be held in the lobby of the Reid-Hillview Airport Terminal building. From Highway 680, exit onto Capital Expressway. Travel Southeast on Capital Expressway. At Cunningham Ave. turn Right. Reid-Hillview Terminal building is straight ahead then slightly left.
