

FAASTeam presents:

Mountain Flying

Flying in the mountains can be some of the most amazingly beautiful and satisfying flying you may ever accomplish. But it comes with increased risk, and, thereby increased responsibility. Every day, GA pilots who fly in the mountains safely calculate and plan for such risks, and you can too.

Join SCFC CFIs for an overview of elements of mountain flying. We'll look at how terrain and mountain weather patterns affect one another and what that means to pilots of small aircraft. We will discuss how to calculate density and what it means for landing and departing at high-altitude mountain airports. And no mountain flying discussion is complete without emergency preparedness and survival gear.

This seminar also serves as a pre-trip briefing for the 2-Day Mountain Flying trip, November 12 & 13, being organized by San Carlos Flight Center. We will use the routing of that trip to highlight the talk, but this session is open to non-participating pilots who wish to obtain the ground instruction related to a mountain checkout.

Any questions, contact us at (650) 946-1700 or info@sancarlosflight.com.

San Carlos Flight Center is committed to promoting safety in general aviation through our evening safety seminar programs. Space is often
