

FAASTeam presents:

Lessons from Commercial Aviation- Captain Lynn Austin

San Carlos Flight Center invites all women pilots, controllers, mechanics, and technicians to join us at our next Fly Like a Girl meeting. This month's topic continues our investigation into women in the aviation industry with guest speaker Captain Lynn Austin of Delta Airlines, who help share with us lessons learned in commercial aviation.

Commercial aviation has come a long way in the last few decades. Most people consider the changes from the viewpoint of a passenger, like in-flight WiFi, wide-body aircraft, and fully reclining first class seats. Today's pilots know there is another side of the equation – the dedicated professionals sitting up front, shouldering the responsibility of everyone onboard. Fly Like a Girl, SCFC's women pilot group, is hosting a series of Meet the Industry presentations to share the stories of the women changing the face of aviation

On November 9th, the women of SCFC welcome Captain Lynn Austin for an informal discussion about the challenges and highlights of her career. She will share with us the highlights of her journey into the cockpit of a major airline, and discuss what it takes to become a Captain at Delta Airlines. How much training was required

to become a First Officer? What in-cockpit safety training happens during a normal flight? How often does a pilot redo simulator emergency training and how effective is it? With questions from the women in the audience, together we will share our thoughts on how lessons from commercial aviation can trickle down to general aviation pilots.

Directions: Pilots who fly in should park in transient parking on the opposite side of the field and expect to walk about 10 minutes (.5 mile) to the Flight Center. Suite 215 is upstairs in the northwest corner. On occasion, rides may be prearranged through San Carlos Aviation and Supply.

A message from the National FAASafety Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
