

FAASTeam presents:

CFI and DPE Forum

Join us for this open discussion between the San Jose Flight Standards District Office, local designated pilot examiners and flight instructors as we talk about the following:

- Common errors and weak areas found on checkrides
 - Paperwork issues and tips for recommending CFIs
 - Preparing applicants when using ACS versus PTS
 - To what degree or level must an applicant demonstrate knowledge
 - Failure rates and what we can do to help students prepare
 - Local policies or things to know
- Please bring any ideas, thoughts, questions or concerns to add to the agenda of topics to discuss. This is a great opportunity to hear from the examiners and FSDO how to best help our students and integrate the ACS into training.

Directions: AeroDynamic Aviation at Reid-Hillview Airport. Come into through their main office entrance and the discussion will be held inside their new classroom.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
