

FAASTeam Western Pacific Region presents:

# Commercial UAS Operations in the NAS System

Join us at the Watsonville Pilots Association to get an inside look at the commercial UAS operations in the Monterey Bay area and throughout the country. This seminar will provide an overview and update on the commercial UAS operations in our National Airspace System and how manned aircraft can operate safely in this new age of drones. He will discuss the importance of training for specific UAS makes and models and present data management strategies.

Gabe Devault, a commercial drone operator with Inspect Tools, has been operating drones for ten years and is excited about fostering education, outreach and co-operation between the UAS and manned aircraft communities. Inspect Tools has operated in the United States, Canada, Estonia, China and South Korea. They have trained dozens of operators around the world and have expert knowledge about the laws and regulations in the US and elsewhere.

**Directions:** From HWY 1 Exit on Airport Blvd and head North on Airport Blvd. Make a left Turn on Aviation Way (0.7Mi from HWY 1) and destination will be on the airport side.

#### **A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
