

FAASTeam presents:

## Recent Trends in GA Safety

As Manager of the Safety Office at West Valley Flying Club, Mike has deep insight into trends that affect all of us as pilots. Mike will present relevant case studies as practical reminders of common risks we face, and then tie these examples into how we can better manage these risks as the pilot-in-command. The discussion will apply across a variety of airplane types and operational situations.

Come hear about these recent trends so you can help reverse them!

Mike May holds an ATP and is type-rated in several business jets that he flies for a living. He is a West Valley CFI/CFII and has been instructing since 1999.

**Directions:** From highway 101 head east toward the bay, turn left after the golf course. West Valley Flying Club is the second driveway on the right. Overflow parking in the golf course lot.

#### **A message from the National FAASTeam Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
