

# What Happens Next When You Land Off Airport

This seminar will examine what happens from the time you land off airport until rescuers find you. We will discuss what affects response times, ELT technologies and malfunctions, terrain considerations for off airport landings, and other relevant topics that affect both the probability that you will be found as well as how quickly. Then we will discuss how you can prepare before you fly for the possibility of having to survive until you are found. This seminar will include a simulated off-airport landing experience.

**Directions:** From highway 101 head east toward the bay, turn left after the golf course. West Valley Flying Club is the second driveway on the right. Overflow parking in the golf course lot.

## A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
