

FAASTeam presents:

Flying in the Mountains - What You Should Know

Looking to fly to, or cross the Sierra Nevada Mountains? This seminar will cover the following topics: Density altitude and performance, aircraft selection, mountain weather, takeoffs and landings, safety considerations, and more.

Darryl Kalthof has been instructing in the SF Bay Area since 1993. He graduated from San Jose State University's aviation program in 1994 with a BS degree in Aviation Flight Operations and has flown as a part 135 cargo captain and commuter airline co-pilot. He has also worked for NASA's Aviation Safety Reporting System and is now a full-time instructor at West Valley, who has traveled to the Sierras 100+ times.

Join us to make your next (or first) mountain flight a safe, low-stress, and fun experience!

Directions: From Highway 101 head east toward the bay, turn left after the golf course. West Valley Flying Club is the second driveway on the right. Overflow parking in the golf course lot.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
