

FAASTeam presents:

Dont Get Frosted

Embedded convection and icing are the IFR pilot's biggest threat. These two phenomenon can bring down rapidly and uncontrollably all aircraft. This seminar will focus on icing.

How do you know where icing is and what the level of risk is? What conditions do you need for it to form and what type of icing can you encounter? Is all icing created equal and if not where will you find the bad boys? Join Dave as discusses Scott Deansteadt's (former NWS meteorologist, CFII and developer of Aviation Weather Workshops and the Weather Sprk APP) approach to icing and how to avoid it.

Dave Kramer MD, an ophthalmologist for over 30 years, is an instrument rated, tailwheel, complex and high performance endorsed commercial SEL pilot as well as a basic and instrument ground instructor with an interest in weather. He has been flying since 2012, has over 1000 hours of which over 400 have been in the IFR system. He also enjoys long cross country flying, night flying and flying in the LA area.

This event qualifies for FAA Wings credit. Any questions, contact us at (650) 946-1700 or info@sancarlosflight.com.

Representative David Kramer

San Carlos Flight Center is committed to promoting safety in general aviation through our evening safety seminar programs. Space is often limited so it is important to sign up early through the FAA event notification system at FAASAFETY.GOV. SCFC members may choose to watch the seminar live over the web at home. Contact your SCFC member service rep at (650) 946-1700 to confirm secure online access to any particular seminar.

Directions: Directions to Room: Pilots who fly in should park in transient parking on the opposite side of the field and expect to walk about 10 minutes (.5 mile) to the Flight Center. Suite 215 is upstairs in the northwest corner. On occasion, rides may be prearranged through San Carlos Aviation and Supply.

A message from the National FAASafety Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
