

FAASTeam presents:

Exiting the Hold

Reaching your Aviation Goals. Much like flying an actual hold, there comes a time in every pilot's career where an honest assessment of skill, performance, desire, and goals needs to be made. Are you one of the many pilots that are stuck in the hold unable to complete your aviation goals?

The psychology of decision making, brain differences in learning and decision making, setting goals for aviation, techniques for overcoming obstacles to attaining ratings, education, complex systems. The speaker has spoken extensively on the subject and encourages all pilots especially anyone who wants to learn to fly, those attaining another rating and rusty pilots to join her.

Psychotherapist, educator, writer, and instrument pilot, Jolie Lucas, discusses the six keys to exiting the holding pattern and reaching your goals. This fast paced, multi-media presentation explores human factors in decision-making, brain science, motivation, and follow-through. The seminar is sure to inspire you to exit the holding pattern and move forward in your life goals. Free admission with RSVP. Refreshments. WINGS credit.

Event Details

Thu, Feb 21, 2019 - 18:00 PST

ACI Jet FBO

945 Airport Drive

Hangar

San Luis Obispo, CA 93401
