

FAASTeam presents:

NOTAMs

NOTAMs carry information of an immediate or transitory nature that has not yet made it into an aeronautical chart. This includes airspace and controlling regulations; you are now bound to comply with the new rules, without any textual or graphical description yet appearing in a printed chart or other document. It's critical that pilots know where to obtain this time-sensitive information and check it before every flight. In this presentation, SCFC Flight Instructor Brian Eliot will overview and describe recent changes to the NOTAM system. He'll discuss various official sources for pilots to find current regulatory and advisory changes to the airspace system and the navigational aids available to pilots. It's important for pilots to understand: failure to know about a NOTAM does not mean that you can't have certificate action for busting one. Ignorance is no protection. All pilots should attend this very special discussion. Brian Eliot is San Carlos Flight Center's resident expert for IFR training and Garmin G1000 avionics. He has been flying since 1995 and received all his training in the Bay Area. Brian previously worked as a broadcast engineer, a software developer, and taught computer science at both the undergraduate and graduate levels. He regularly presents at San Carlos Flight Center

Event Details

Sat, May 25, 2019 - 12:00 PDT

San Carlos Flight Center

655 Skyway Road, 215

215

San Carlos, CA 94070

safety seminars and has a reputation for making complex concepts easy to learn and understand.

Directions: Pilots who fly in should park in transient parking on the opposite side of the field and expect to walk about 10 minutes (.5 mile) to the Flight Center. Suite 215 is upstairs in the northwest corner. On occasion, rides may be prearranged through San Carlos Aviation and Supply.

A message from the National FAASafety Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
