

FAASTeam presents:

Ground School Refresher - Aeromedical Factors

Human body dynamics are complicated on the ground, and really interesting when you take them up thousands of feet in elevation. The reduction in ambient air pressure causes human bodies to do some interesting things.

Join CFI Bryce Pfeiffer as he reviews important Aeromedical Factors such as the four types of hypoxia, the impact of medicines and alcohol on the human body, and how the human eye and mind can be fooled by various spatial and visual illusions. He will also go over some common over-the-counter medications that most pilots don't think inhibit their ability to fly but may actually be dangerous.

Come to this seminar in the ground school refresher series to review the impact of flight on the human body and become a safer pilot.

Bryce was raised in northeastern New Mexico, where he did his initial pilot training at the base of the Rocky Mountains. He then finished up his training in Northern California. Bryce grew up working on cars, camping, and dreaming about being a bird. He got his passion for flying from his grandfather who flew an E2 in the US Navy.

Event Details

Sat, Aug 31, 2019 - 12:00 PDT

San Carlos Flight Center

655 Skyway Road, 215

215

San Carlos, CA 94070

Contact: DAN KELLY DYER

(415) 305-9051

dan@sancarlosflight.com

Select #: WP1595156

Representative DAN KELLY DYER

Directions: Pilots who fly in should park in transient parking on the opposite side of the field and expect to walk about 10 minutes (.5 mile) to the Flight Center. Suite 215 is upstairs in the northwest corner. On occasion, rides may be prearranged through San Carlos Aviation and Supply.
