

FAASTeam presents:

# Ground School Refresher Airspace

Let's face it, airspace is an imaginary concept. It is just a shorthand way to talk about the set of Federal Aviation Regulations that apply by location and altitude, and the impact they have on VFR flight. As confusing as you think the rules are, with a quick refresher, you'll be back to full knowledge in no time.

If it has been a while since you sat through ground school, you may be due for an airspace refresher. In this safety seminar, we will review the different classes of airspace that are found in the United States. We'll cover their shapes, sizes, operating rules, and also cover special use airspace. Want an easy way to keep confusing Class G airspace rules memorized, use the Flight Center's method that teaches there are 3 types of Class G airspace, Class G-low, Class G-mid, and Class G-high. Do you know the differences between them? Where would you look it up? What happens to Class D when the tower closes? How well do you know airspace? This safety seminar is open to current and aspiring Private Pilots, and will be of particular interest to students pilots and those who are preparing for a flight review. You will leave the seminar with a renewed understanding, and probably a few memory aids to take with your on your next flight.

## Event Details

**Wed, May 13, 2020 - 19:00 PDT**
