

FAASTeam presents:

Ground School Refresher Beyond Simple Airspace

Think you know everything about airspace? It might surprise you to learn there is much more to it than simple alphabet airspace (A, B, C, D, E and G). With many different types of airspaces and restrictions, it could be tough for a pilot to stay proficient within these knowledge areas. San Carlos Flight Center invites Chief Pilot and CFI Herb Patten to guide us through an exploration of unusual airspace, seeking how to remain compliant with regulations in spite of confusing chartered airspace. Together we will discover the unusual and different airspace defined in 14 CFR part 93 special air traffic rules. We will investigate unique special military areas and tools to check their status. Herb will elucidate the differences between VFR corridors and VFR flyways. Finally, the discussion wouldn't be complete without exploring class Echo surface areas and a nod to history with a review of airspace classified as TRSA.

Pilots of all backgrounds and ability levels are welcome to attend and participate in this interactive review and exploration of airspace.

Herb Patten is the Chief Pilot at the San Carlos Flight Center, a CFI and an FAA certificated advanced and instrument ground instructor who
