

FAASTeam presents:

Radio Communications 4 Class B and C Airspace

Pilots new to the SF Bay area sometimes feel uncomfortable communicating with controllers in busier Class B and C airports. Let's address that. Let's talk about radio communications and help each other overcome fears, operate more safely, and smooth the work of Tower and Approach Controllers.

In this seminar, San Carlos Flight Center continues our radio communications series, this time focusing on general aviation operations at Class Bravo and Charlie airports. SFO, OAK, and SJC come with a whole new set of challenges for GA pilots; increased traffic loads operating in the airspace, more frequency congestion, different entrance requirements, and a whole lot more. This seminar can help you to become a more effective communicator within class B and C airspace, and prove to the controllers that you got it under control. You surely won't want to miss this seminar if you have ever felt uneasy operating within Class B or C airspace. This seminar is guaranteed to make sure that all pilots will feel safer on their next flight into these airports, don't miss out.
