

FAASTeam presents:

RESENT Ten Secret Sights on the California Coast only Pilots can See and How to Fly them like a Pro

Resent with updated link to this webinar. Due to popular demand, we're back! Don't miss out on your last chance to see the seminar one pilot called "one of the best I have seen in my 17 years of flying in the Bay Area."

California pilots are treated to the jaw-dropping beauty of the coast on a regular basis, but we bet you've never seen it like this. Join a former NOAA research pilot and a PhD Geologist for a new kind of coastal tour to unlock ten secret sights you can only see from the sky.

We'll spice up your coastal flying with an aerial tour of history and wildlife spanning all the way from Shelter Cove to the Channel Islands. Learn where to spot whales and sharks, how to fly along the San Andreas fault, and hear wild stories of flying for science. We'll cover all this while teaching you easy-to-follow tips and tricks to keep you safe and protect our ocean treasures.

All pilots are invited to attend this truly unique and fun opportunity. A brief overview of the WINGS Pilot Proficiency Program will be offered at the webinar opening.

CDR Matthew Pickett, NOAA (Ret) served twenty

FPM KAREN ANN ARENDT

years providing operational support for research missions aboard ships, small boats, aircraft, and SCUBA diving, and rose to become Chief of the Remote Sensing Division Flight Branch. He flew a DeHavilland Twin Otter and Cessna Citation on far-flung missions including Arctic polar bear surveys, high-altitude mapping, and fisheries enforcement.

After retiring from active flying, CDR Pickett served as the Operations Manager for the NOAA Collaborative Center for Unmanned Technologies and in 2016 co-founded the nonprofit Oceans Unmanned with the mission to facilitate the use of unmanned technologies for environmental research and monitoring.

Wendy Kordesch is the Outreach Specialist at the Seabird Protection Network, and builds partnerships with pilots to help wildlife thrive on our coasts. She holds a PhD in Ocean Science and has presented to dozens of pilots, flying clubs and organizations across the Bay Area, as well as the US Coast Guard.
