

FAASTeam presents:

# **ONLINE VIEWING ONLY Ground School Refresher VFR Charts**

Available for Online Viewing Only.

San Carlos Flight Center is temporarily moving its seminars from in-person attendance to online viewing due to the public health risk from the Coronavirus. As a courtesy the center is making this streaming service free to the public at <https://sancarlosflight.com/covid-19/seminars> Do you know how to identify where certain VFR reporting waypoints are on a chart? Do you know if the airport you are landing at has an operating beacon? Do you know if the airport you are landing at has pilot controlled lighting, or lighting at all? Or maybe if you just want a VFR chart refresher, this is the place for you to be.

VFR charts pack an extraordinary amount of material and represent a 3-dimensional world of terrain and airspaces in 2 dimensions. They describe graphically the earth as it looks to us pilots from the air. And no matter how much we study them and how good we get at interpreting them there is always something new or some little nuance that we didn't realize. Lastly, they are fun. Who doesn't enjoy looking at a map, especially an aviation one?

Join a San Carlos Flight Center CFI Russel Bowerman as he gives a ground school refresher. He will actively involve the audience in this fun review of VFR charts and point out

## Event Details

**Sat, Mar 28, 2020 - 12:00 PDT**

**San Carlos Flight Center**

655 Skyway Road

215

San Carlos, CA 94070

interesting facts that you then can go out and impress your friends.

Russel Bowerman has always maintained an interest in aviation, visiting aviation museums, taking sightseeing flights, and staying up to date on all the newest fighter jets and airliners. After receiving his Private Pilot Certificate in 2018, he decided to make a career of it, attaining his Commercial and CFI ratings. Russell has been teaching and loving it ever since. Beyond flying, he really enjoys traveling and feels lucky to meet new people and learn about their diverse backgrounds in the process of flight training.

**Directions:** Pilots who fly in should park in transient parking on the opposite side of the field and expect to walk about 10 minutes (.5 mile) to the Flight Center. Suite 215 is upstairs in the northwest corner. On occasion, rides may be prearranged through San Carlos Aviation and Supply.
