

FAASTeam presents:

# Mountain Flying

See Webinar Information to Register. Flying in the mountains can be some of the most amazingly beautiful and satisfying flying you may ever accomplish. But it comes with increased risk, and thereby increased responsibility. Every day, GA pilots who fly in the mountains safely calculate and plan for such risks, and you can too.

Spring weather brings cool temperatures, clear skies and smooth air. It can also occasionally bring the threat of snow and ice, which are good things to learn to respect during trips to airports at higher elevations. Join CFI Brian Eliot for an overview of elements of mountain flying. We'll look at how terrain and mountain weather patterns affect one another and what that means to pilots of small aircraft. We will discuss how to calculate density and what it means for landing and departing at high-altitude mountain airports. And no mountain flying discussion is complete without emergency preparedness and survival gear.

This seminar is intended to meet the ground training requirement for an SCFC Mountain Checkout, and is required for all pilots participating in the FlyOutGroup 5-day Mountain Flying trip in early July. For more information, go to <https://sancarlosflight.com/events/fog>

FPM KAREN ANN ARENDT

If you are planning a trip to the mountains anytime soon, or just want to learn more about mountain flying; don't miss out on this seminar.

**Directions:** Step 1:

Create a free flight center account by clicking on this link.

Step 2:

Log-In to your Flight Center account through our main website.

Step 3:

Proceed to this link at the listed seminar start time to watch the seminar live. If you have any questions for the presenter, you will find in the bottom left corner of your screen an "Ask a Question" button to ask your questions.

If you have any technical difficulties signing on to our Livestream at the time of the published seminar, please let me know as soon as possible.
