

FAASTeam presents:

Medical Certification Q and A

This seminar is postponed due to inclement weather. Check back for updates. For many pilots, the medical examination is a source of unnecessary stress. Dr. Matthew Trip, AME/CFI, hopes to demystify the process by giving you a glimpse into what happens on the AME side of the curtain, explaining the behind the scenes of being an AME. He will answer pilot's most common questions, including many that often go unasked. His goal is for attendees of this seminar to come away feeling that their AME can actually be an advocate for them and keep us all flying safely. Topics to be covered include: An overview of the training your AME goes through What happens before and after the pilot leaves the office What to expect in the office Do's and don'ts for pilots on MedXPress SODAs Special Issuances Medications What if I have high blood pressure, diabetes, or ADHD? DULs How your AME can (and should) help you! Time to answer your questions or concerns

Directions: Our seminar will be held in the AeroDynamic Aviation building at Reid-Hillview Airport (KRVH) in San Jose. Our classroom is just inside the main office entrance.
