

FAASTeam presents:

IFR Low Enroute Charts

Most IFR pilots probably have a general understanding of IFR charts, including Victor airways, MEAs, etc., but when was the last time you really looked closely at all the information available on an IFR Low Enroute Chart. Do you recall how to decipher MRAs? Can you identify the different types of fixes along an airway? It's always a good idea to stop and refresh these important ground knowledge items.

SCFC Chief Pilot Herb Patten is back with a safety seminar to give depth and meaning to this important IFR resource. He will demystify the numbers and markings on the FAA's IFR Low Enroute Charts and help pilots develop a better understanding of the details on these charts. Herb will explain waypoint and navigational aid symbology, and describe the various altitudes shown on the charts.

This is a valuable safety seminar for new IFR Students and a great refresher for pilots who are already instrument rated. Don't miss out on this chart refresher so you won't miss anything when planning your next IFR flight.

Herb Patten is the Chief Pilot at the San Carlos Flight Center, a CFI and an FAA certificated advanced and instrument ground instructor who teaches private pilot ground school at San Carlos Flight Center. He is a commercial pilot with an
