

FAASTeam presents:

# Ground School Refresher VFR Charts

VFR charts pack an extraordinary amount of material and represent a 3-dimensional world of terrain and airspace in 2 dimensions. With such a wealth of information, do you really know how to read them? For example, do you know how to identify where certain VFR reporting waypoints are on a chart? Or can you determine if the airport you are landing at has an operating beacon, pilot controlled lighting, or lighting at all? San Carlos Flight Center invites CFI Edward Abraham to give pilots a refresher on VFR charts. He will entertain you while educating you about common as well as uncommon VFR charts symbology. In this seminar expect a thorough investigation of these charts, the related symbology, and interesting facts that you could use to impress your friends. Throughout the presentation, Edward will provide many real-life examples and allow the audience to follow-along looking at charts on their own. While you may know the basics, there is always something new or some little nuance that we didn't realize. All pilots can benefit from a refresher on VFR charts, so join us to refresh your memory and learn more.

Edward Abraham is a CFI at San Carlos Flight Center. A Bay Area native and aviation

## Event Details

**Wed, Apr 5, 2023 - 19:00 PDT**

Representative BRANDAN DADOUN

enthusiast, his passion took flight after graduating from San Jose State University with a degree in business management and a minor in aviation. After graduating, he worked as a Customer Service Supervisor for United Airlines while simultaneously building hours and working towards his advanced ratings at the San Carlos Airport. Edward is excited to be a flight instructor for the San Carlos Flight Center and looks forward to teaching the next generation of pilots.

**Directions:** NO REGISTRATION REQUIRED, FOLLOW STEPS BELOW TO ACCESS OUR LIVESTREAM:

Step 1:

Create a free flight center account by clicking on thislink.

Step 2:
