

FAASTeam presents:

# Enroute Radio Communications

Flying through in the many airspaces of California requires a high degree of situational awareness and sophisticated radio skills. And yet, radio communication is rarely taught as a specific subject during private pilot training. Usually, new pilots just absorb what they hear on the frequency around them, both good and bad. Although some radio techniques are covered in ground school, rarely do student pilots get the time devoted to demystifying this often-confusing subject.

San Carlos Flight Center invites Chief Pilot Herb Patten and CFI Dan Dyer to show how to perfect your communication and phraseology. They will cover radio phraseology from the basics through advanced ATC services with emphasis on flight following and flight service stations. This seminar will include many examples on how to recognize bad radio calls, and how to fix them. Learn how to make radio communication easier and safer for all pilots.

If you are interested in becoming better at your radio, you don't want to miss this seminar.

Dan Dyer is the founder of the San Carlos Flight Center, and has built the motto of Safety, Community, and Adventure for over 8 years. Dan was an instructor for 15 years, accumulated over
