

FAASTeam presents:

I Just Got ForeFlight Now What A Beginners Guide to ForeFlight

Students and new pilots are increasingly flying with computer tablets, and using software that replaces paper charts and documents with the digital equivalents. These applications, such as ForeFlight, are extremely powerful and have a plethora of features. For a pilot just beginning to use ForeFlight, the choices and options seem overwhelming. Valuable features and capabilities can go undiscovered.

Join SCFC in inviting commercial pilot Brandan Dadoun to highlight some of the important first steps to take after downloading ForeFlight, and how to get started. In this seminar, he will cover a basic introduction to the application including the most efficient ways to use the software. With so many different customizations, subscription plans, and ways to do the same thing, it can be overwhelming for many. Some of these include how to set up performance profiles, weight and balance, how to use geo referenced charts, and set up your electronic logbook. After this seminar you will feel confident in your basic abilities to navigate the application and have the resources to continue to learn from.

ForeFlight can be quite overwhelming with features, however, due to time constraints we are unable to provide technical support to individual audience members.

Representative BRANDAN DADOUN

If you are just beginning to explore the features of ForeFlight and want to deepen your understanding on how to effectively use these great tools, you will want to attend this seminar. Have your tablet handy and discover this powerful tool available for pilots

Brandan Dadoun is a commercial multi-engine pilot and SCFC's Seminar Coordinator. He has over 700 flight hours with extensive flying experience throughout the Western US in both piston and turbine-powered aircraft. In 2021, Brandan was awarded by the FAA for his achievements in promoting aviation safety. Outside of flying and presenting, he enjoys playing the saxophone and staying active.

Directions: Welcome to San Carlos Flight Center and our Safety Seminar Program.

San Carlos Flight Center believes in the philosophy that a good pilot is always learning. We are proud to have the most active Safety Seminar Program in the country where pilots of all abilities and skill levels can come to learn something new. We host seminars twice a week, on Wednesdays at 7 PM, and on Saturdays at 12 PM. Join us to master challenging ground topics, discover new flying destinations, fine-tune radio skills, and learn from industry professionals. With an active in-house speaker bureau and a growing guest-speaker base, we continue to schedule a wide variety of presentations, equipping you with the knowledge to operate more safely. Join us to view our seminars in person at our facility in San Carlos, located at 795 Skyway Road, Suite A San Carlos, 94070. Seminars will be available to view in person at our facility in San Carlos for free. Prior to attending any safety seminar please review and abide by current CDC, State and Local health guidelines. To register and secure your seat for this event, create a free account on our website by clicking [here](#), find this seminar on our upcoming events page by clicking [here](#), scroll down, and click "register".
