

Meet the Piper Saratoga

The Piper Saratoga is the latest addition to the Flight Center fleet. It is a six-seat, retractable gear low wing plane powered by a Lycoming IO-540 engine. How does this airplane compare to other airplanes in the Flight Center fleet? What missions would be ideal for the Saratoga?. What is involved in upgrading your ride from the Piper Archer or Dakota to the Saratoga?

San Carlos Flight Center is pleased to introduce the Piper Saratoga in this seminar. Join Herb Patten as he provides an overview of the key differences present in this aircraft compared to others of its class. He'll explain the various mission profiles the aircraft is capable of, and the associated training and requirements for SCFC pilots.

Representative Herbert Patten n/a

Join us to learn more about the Piper Saratoga. Whether you are interested in getting a checkout in this airplane or just want to learn about the details of the Saratoga, you should attend this presentation.

The seminar will be in-person at the San Carlos Flight Center, 800 Skyway Road in San Carlos.

Note: Construction is occurring at 795 Skyway Road so the seminar will be in the portable classroom just past 795 Skyway Road.

San Carlos Flight Center is on the southwest side of the airport and there are no transient aircraft parking spots on the field other than the Transient Parking adjacent to the SQL Terminal Building. If you plan to fly in for the event, please be aware that we have no parking spots and that you'll need to walk 0.7 miles around the airport from airport Transient Parking to our offices.
