SJC FAASTeam Rep Daniel Henriks presents:

How ATC Impacts Crew Resource Management

Join us for an engaging FAASTeam seminar featuring an informal Q&A session focused on everything related to Air Traffic Control (ATC). We will discuss what controllers expect from pilots, recommended procedures for VFR and IFR operations, and strategies for ensuring clear and efficient communication. Additionally, we'll address student pilot operations, including how controllers assist student pilots and offer tips for gaining confidence in towered airspace. Our special guest is Eric Flemming, a tower controller and Certified Flight Instructor (CFI). The seminar will be hosted by FAASTeam Representative and Gold Seal Instructor Daniel Henriks. This event is open to pilots of all experience levels, ranging from student pilots to experienced airline transport pilots. Monterey (MRY) is one of two airports in the San Jose district that are on the Runway Safey Action Team's (RSAT) watch list. The information shared should prove invaluable to the safe aircraft operations for all parties.
