

General Aviation Accident Survival

With increased and greater training and properly equipped for survival of forced landings or crashes, the FAA has determined a significant number of GA fatalities could have been avoided. It can happen quickly, finding yourself in a survival situation. Successful outcomes require knowledge, discipline and planning. What training and preparation should all pilots take to increase their survival rate? Some of these factors will be discussed in this presentation.

Directions: From the town of Mariposa, take Highway 49 North for 26 miles. Airport will be on the right

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
