

# Enhanced and Synthetic Vision; Innovations to improve aviation safety!

The General Aviation Joint Steering Committee (GAJSC) has determined that a significant number of general aviation fatalities could be avoided if pilots were better oriented with respect to their operational environments. Weather, night, smoke and other obstructions to vision can compromise safety, especially when operating close to the ground. Enhanced and Synthetic Vision Technology -- now available for installation in general aviation aircraft -- could lower the number of reduced visibility accidents.

**Directions:** Take Parrotts Ferry Road to the north end of the old town of Columbia. Then turn left on to Airport Road (north of the airport). Proceed to Chile Gulch Road and turn left. Turn left again at the gate to the camp ground. See this link for Additional information:  
<http://www.tuolumnecounty.ca.gov/index.aspx?NID=705>

## A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.  
Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

## Event Details

**Tue, Dec 29, 2015 - 19:00 PST**  
**O22 Pavilion located in the camp ground on the airport.**

10723 Airport Rd., Columbia, Ca.  
95310

Campground Pavilion  
Columbia, CA 95310
