

Stabilized Approach and Go Around

This presentation acquaints the audience with LOC accident experience and makes the case that stabilized approaches and go-arounds can be key to avoiding many LOC events. Suggestions for how to achieve stability, how to avoid de-stabilizing influences, and tips and tricks are presented.

Directions: Mariposa Airport is located approximately five miles north of Mariposa on Hwy 49 North, turn right on MacCready Way.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
