

Emergencies NOT found in the POH / AFM

The POH / AFM under Section 3 contains procedures to manage emergencies. These procedures do NOT contain details / guidance for off-nominal conditions. As an example, an alternator failure in IMC or at night. In these situations, procedures will vary. What about other emergencies not in the POH / AFM?

Vibrations, fuel / oil in the cockpit, limited / reduced control power? It's the pilot's responsibility to manage the emergency to a safe outcome. This presentation will review select emergency procedures under various conditions and provide insight on managing emergencies that you normally would NOT find in the POH / AFM.

Bakersfield Flying Club is located on the second floor of the Bakersfield Jet Center. The meeting room entrance is on the north side of the building on the second floor. Fly-ins are welcome. Avoid a ramp fee by topping off your aircraft.
