

LAS FSDO - FAASTeam presents:

**Grand Canyon & 14CFR93 - Flying to the LA Basin -
Professional Maintenance Practices.**

Three great talks by three knowledgeable

FAASTeam Representatives:

First: The Grand Canyon ... Fly it Smart ... Fly it Safe ... Compliance with 14CFR93

In our back yard lies one of the most premier natural attractions in the world. FAASTeam Representative Chad Hesterman will walk you through conducting a safe and rewarding aircraft journey into the Grand Canyon National Park. Chad will break down the special flight rules that you need to know during our virtual flight through the Grand Canyon special airspace. Points covered will include area airports, routings, communications, chart interpretation, unique weather, terrain challenges, and respecting our Part 135 Tour Operator neighbors. If you are new to flying to the canyon, this talk will be a must in order to build your confidence. If you have already explored the Grand Canyon by air, Chad will give some information that might make your next journey even more safe and enjoyable.

Second: Flying to the LA Basin

Our close proximity to the LA metroplex provides ample opportunities to experience great weather, beautiful beaches, several wonderful attractions and yes, great flying. Lead FAASTeam Representative Earl Jobson will discuss

Event Details

Tue, May 6, 2014 - 7:00 pm

Boulder City - City Hall

401 California Ave

Council Chambers

Boulder City, NV 89005

JOBSON

procedures and techniques you need to know in order to safely fly into different airports in the LA area. This presentation is designed to help you have fun, and build up proficiency so you can routinely and safely fly to these exciting destinations.

Third: Practicing Safe and Practical Maintenance with your aircraft.

FAASTeam Representative Mike Baxter will present some really good recommendations on how to keep your aircraft airworthy through sound maintenance practices and routine inspections. He will discuss minimum equipment you should consider for safe flight and how that relates to the TCDs. Learn how routine maintenance vigilance can greatly enhance the continued airworthiness of your aircraft.

Directions: Proceed to Boulder City on US 93/95. Upon driving through town turn right on California Ave and City Hall will be on your left. Ample parking out front.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
