

Las Vegas FAASTeam presents:

Emergencies Procedures Training/Senior Pilots and Performance

Fresh from Beech 1900 training, Catherine Stockdale will be sharing her training in emergency procedures as a means of reducing fatal general aviation accidents. Scenario based training is encouraged because it places pilots in realistic and complex situations. This works well for both single and multi-engine airplanes. Retired Lockheed Test Pilot, ATP, CFII, MEI, AMT, Joe Biviano takes a humorous approach on how pilot performance is effected by age. He will explain the symptoms to recognize pilot performance degradation and how to manage these effects so pilots can safely continue flying. Be prepared! Someday you will be a Senior Pilot!

Directions: Modular room adjacent to the North Las Vegas Air terminal building. Restaurant is still open for business. The North Las Vegas Air Terminal is just off Rancho Rd., South of Decatur. Plenty of convenient parking for drivers, and ramp parking for those flying in.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
