

Las Vegas FAASTeam presents:

Aviation Weather Review plus Flying Your Own Grand Canyon Air Tour

Aviation Weather

Chris Outler, Lead Forecaster at the NWS in Las Vegas, will discuss how to prepare a pre-flight weather briefing, common summer weather hazards including radar interpretation and high density altitudes. Chris will take us on a tour of a few of the best Aviation Weather websites, their best use and interpretation.

General Aviation Flying Over the Grand Canyon
Cathy Stockdale, Beechcraft 1900 pilot, CFII/MEI and FAA Safety Team Lead Representative will brief us on airspace rules over the Canyon, routes, altitudes, frequencies, where to fly and where not to fly. Fly your own Grand Canyon tour safely, legally, and with the knowledge that you've done your homework before you launch.

Bring a Grand Canyon VFR Sectional Chart and follow along.

Directions: Grand Canyon Room inside the North Las Vegas Airport Terminal. Loads of free parking in the lot and Ramp Fee waived for those flying in for the Safety Meeting.
