

Las Vegas FAAS Team presents:

Multiengine Flight Dynamics -- Know what you are in for

Whether or not you are Multiengine qualified or just thinking about earning the privilege...this event is for YOU. Join us tonight as we explore the fascinating world of Multiengine Flight Dynamics and investigate HOW and WHY redundant is not always safe. You will have the opportunity to discover for yourself areas of knowledge that may have become rusty due to disuse OR tonight's experience will be an introduction into a corner of aviation that fewer and fewer pilots are experiencing today due to the costs and risks involved.

This program is designed to be interactive and NOT a lecture down a one-way street.

Multiengine Flight Dynamics has its foundation in Single engine airplane operations so everyone will have some background and experience from which to call upon and participate.

Please download and SAVE the Airplane Flying Handbook (link below) and have it open in another tab on your device for real-time research. You will be kept busy during this event.
