

FAASTeam presents:

The Adventures of Ramona Cox, back-country flying

The Adventures of Ramona Cox, a 25-year pilot known as SkyChick, will share the joys and trials of her AIR-camping explorations over the past 12 years in her Cessna TU206. During her 3-4 month trips, she packed her airplane with a kayak, motorized bike, 6-man tent, mobile office essentials, satellite phone and weapons. While dodging bear, mountain lion, snakes and unruly moose, she fished or hunted for food and explored some of the most remote and pristine wilderness airstrips within the US. Using stunning aerial and wildlife photography combined with video, humor, real life drama, inspiring stories and lessons learned, SkyChick will share safety tips for flying in the back-country regions and landing on unimproved airstrips with emphasis on how the terrain conditions and weather can affect landings and take-offs. As a gear tester and reviewer, you'll hear her recommendations for the latest technological gadgets designed to improve comfort and safety. For those who prefer a comfortable hotel over a tent, she will share suggestions with photos and commentary on FUN places to fly (both paved and unpaved) sprinkled throughout the presentation. For a sneak peek into the world of an adventure pilot, check out www.skychick.com and click onto the homepage "SLIDESHOW". Ramona's
