

FAASTeam presents:

Risk Managemnt

Risk Management has been used for years by people at all levels and in all occupations and environments to anticipate hazards and to be safe. In its most simple terms, Hazards Awareness and Risk Management Fundamentals is a way of approaching your aviation tasks with a better awareness of the obstacles, conditions, and events that may harm you or prevent you from achieving your objectives, whether performing routine maintenance, running a flight school, running an air taxi/flight seeing operation, or simply going to get that \$5.00 hamburger. The beauty of these tools and processes is that they can be applied to almost all activities, even non-aviation ones.

This presentation will provide a sound foundation for your participation in the System Safety program and will show you how to integrate risk management into your normal GA activities. It is intended for all involved in any aspect of general aviation and with an interest in how to think and act in a smarter safer manner.

Directions: See attached map.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

Event Details

Fri, Oct 21, 2016 - 11:30 PDT

Flying Aviation EXPO

3000 E Alejo Road

NATCA Safety Learning Center

Palm Springs, CA 92262

Contact: Dr. PAUL M FOSTER
