

Emergency Procedures Training

In this presentation we'll discuss recommendations from a work group that studies loss of control. The General Aviation Joint Steering Committee or GAJSC is a government/industry group that studies GA accidents and makes recommendations for adoption of what they call safety enhancements. One safety enhancement promotes Emergency Procedures Training as a means to reduce fatal general aviation accidents. Scenario-based Training is encouraged because it places pilots in realistic, complex situations. Scenario-based training works well for single, and multi-engine airplanes and it's also effective in Computer-based training and Simulation.

Directions: See attached map. You will also need to be buzzed in, so please read the instructions on the gate.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
