

FAASTeam presents:

# Smart Cockpit Technology

In this presentation we'll talk a little bit about recommendations from a work group that studies loss of control. The General Aviation Joint Steering Committee or GAJSC is a government/industry group that studies GA accidents and makes recommendations for adoption of what they call safety enhancements. One of their safety enhancements promotes equipping GA aircraft with Smart Cockpit Technology. We discussed Electronic Engine Control in a previous Topic of the Month but we'll revisit it and aircraft performance monitoring in this presentation as key components of an integrated cockpit information stream. That information stream is informed by internal and external sensors and data sources. Free Hamburgers and Hotdogs Lunch provided.

**Directions:** Near the corner of Aviation Drive and Airway Ave and just follow the signs. If you are flying in, transit parking is available at the threshold of Runway 06.

#### **A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.

## Event Details

**Sat, Apr 21, 2018 - 11:00 PDT**

**Tortoise and Hare Aviation**

6918 Airway drive

Hangar 1

Yucca Valley, CA 92284
