

# Basic Instrument Course Workshop

Cool, crisp and clear... Winter conditions can make for some very enjoyable and memorable flights. Between those beautiful sunny days, however, winter can also provide conditions that we may not be ready for. We'll cover emergency procedures for VFR pilots who might encounter IFR conditions, in-flight radio procedures, voice communications, situational awareness, radar assistance and pilot responsibilities.

**Directions:** American Flyers Hangar Classroom. Enter and sign in through the main lobby. Exit to the ramp and make left. Classroom will be on west side of hanger.

## A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
