

Aviation Safety Roundup: a look at safety issues facing GA pilots today.

Statistics show that the General Aviation safety record is not very good. So, how do we become safe pilots? Local Flight Instructor and FAASTeam Representative Irwin Fust will discuss the many safety issues facing pilots today. Such topics as Loss of Control (will AoA instruments help?), Risk management as a pilot, medical issues facing older pilots and a short update on ADS-B will be discussed.

Directions: The Safety Seminar will be held at the Corning EAA 1148 hangar on the Corning Airport. If you're driving, enter the airport at the North end and travel South to the EAA hangar. If you're flying in, park at transient parking and walk to hangar.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
