

Airspace and Sectional Charts Made Easy!

Using a Sectional Chart, we'll take a flight from the Sierra Nevada mountains to the San Francisco Bay area. You will be introduced to an easy way to determine what the requirements are as portrayed on Sectional and Terminal Area Charts: from the surface to outer space! Another flight will take us from Palo Alto to Compton. Whether you are a Student Pilot or a 25,000 hour plus retired Captain, this presentation will give you the tools to fly safely in our national airspace system. Please bring a SFO Sectional and terminal Area Chart(Digital or Paper). We'll have a limited number of charts to use if you do not have one.

Directions: Located in the Restaurant/County Building at the Napa County Airport.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
