

## Being a safe and smart pilot in today's environment

A wise pilot is a safe pilot. Do you have the tools to safely fly in today's environment? Local FAASTeam Representative and Certified Flight Instructor Irwin Fust will update the latest information on the tools and technology available to pilots; ADS-B, 3rd Class Medical Reform, modern flight planning tools and obtaining a good weather briefing. In addition, he will discuss the latest initiatives that industry and the FAA are exploring to address number one on the list of pilot fatalities, Loss of Control. Also, do you know your Airspace IQ?

**Directions:** The Safety Seminar will be held at the Corning EAA 1148 hangar on the Corning Airport. If you are driving, enter the airport at the north end and travel south along the ramp to the EAA hangar. Park alongside hangars. If you are flying in, park at transient parking and walk to hangar.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
