

# Pilot Controller Communications NorCal Airspace One on One with Norcal Controllers

NorCal Controllers Pat Burke and Aleks Koleukhov will be discussing with local pilots about the radio communication and procedures for flying in the area. Detailed discussion on the local flight paths, hot spots etc. It will be a great refresher on how communication should go between ATC and pilots especially in high density traffic areas. Special focus will be on VFR flight following requests, frequency changes and expectations on the part of controllers and pilots. There will be face-to-face discussion with controllers to understand the process better and operate safer.

**Directions:** Sacramento Executive airport main conference room next to the pilot lounge.

## A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
