

FAASTeam presents:

# GA Aircraft Systems

GA airplanes have numerous systems to understand and interpret.

How well do you know your aircraft and its systems? Do you understand how they work, how to diagnose and interpret malfunctions in flight?

This one-hour seminar will cover four of the major systems on many GA aircraft: fuel, electrical, hydraulic, and flight control.

Mike Smith is the CEO of Mike Smith Aviation. Mike holds an ATP and is a CFI, MEI and CFII. In addition, Mike is an A&P and IA. With over thirty years in the industry, Mike's experience ranges from piloting hot air balloons, flying a vintage Tiger Moth in the Australian outback, to spending time as the deputy director with CASA, Australia's Civil Aviation Safety Authority. Mike is an SMS pioneer and has implemented SMS programs around the world.

**Directions:** Proceed to the parking area near the Napa County Airport Terminal Building. Enter the Terminal, turn right in the lobby, and proceed down the hallway to the Airport Administration Office. Through the doorway, conference room will be to your left.
