

Airspace and Sectional Charts Made Easy!

Using a Sectional Chart, we'll take a flight from the Sierra Nevada mountains to the San Francisco Bay area. You will be introduced to an easy way to determine what the requirements are as portrayed on Sectional and Terminal Area Charts: from the surface to outer space! Another flight will take us from Palo Alto to Compton. Whether you are a Student Pilot or a 25,000 hour plus retired Captain, this presentation will give you the tools to fly safely in our national airspace system. Please bring a SFO Sectional and terminal Area Chart(Digital or Paper).

Directions: Located 1st floor County Terminal Building

A message from the National FAASTeam Manager
