

Your **BRAIN** and your aviation aircraft **piston engine** requires **OXYGEN**

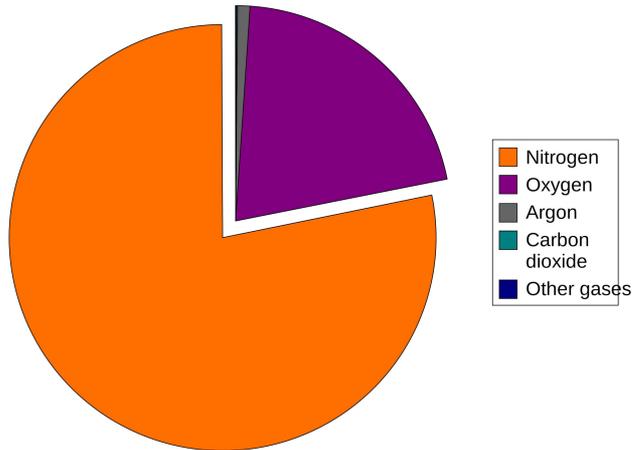

Your **Propellor** and your **Wing** require a **fluid to move** (AIR)

Our earth's atmosphere is 78% Nitrogen and 21% Oxygen

Before you engage the starter..... Ask yourself...

How much oxygen or air is available to me right now?

ATPBill@duck.com - Redding CA

HIGH

HOT

HUMID

**WHAT WILL THAT DO TO YOUR
BEP-W ?**
