

## Airspace Beyond the Regulations

At some point as student pilots, we probably memorized the airspace cloud clearances, visibility, and communications requirements and regulations. After a brief time, this memorization may fade or the information just does not seem to make sense in the real world.

This course aims to help us understand the "WHY" of these regulations, and how we can more easily understand what it means for us in real world flying. We think that this class will be helpful to Students and Certificated Pilots alike. Please join us to see how we can all safely integrate our aircraft into the national airspace system.

Auburn Airport building at the end of New Airport Road. Barnstormers Room is the large room on the Northeast corner of the building. Access through main double doors on North facing wall.
