

Safety Management System Part 5 Rulemaking Change

An Aviation Safety Management System (SMS) is a systematic approach to managing safety in aviation operations. It involves a set of principles, processes, and measures to prevent accidents, injuries, and other consequences of bad safety practices.

Through the use of SMS, General Aviation Aircraft operators can proactively identify and manage risks. Under a formalized SMS, operators identify potential hazards and ensure that a process is out in place to effectively manage them.

You are invited to the following ZoomGov Webinar provided by FAVES. Optional ways to join are:

Click to Join:

<https://faavideo.zoomgov.com/j/1602219922>

Password: 709836

- If prompted, accept the Zoom application as instructed
- For a camera enabled PC or laptop & Optimized for Google Chrome or Microsoft Edge
