

FAASTeam presents:

Operations at Truckee airport and the challenges of Mountain Flying

For every Bay Area pilot eager to stretch its wings beyond the boundaries of the Bay, the Lake Tahoe region and its main airport at Truckee are a dream destination. The flight is however fraught with many challenges beginning with the airport high elevation, the changing conditions associated with mountain flying and rubbing wings with the jets and gliders who also operate at Truckee.

In this seminar, Hardy Bullock, Director of Aviation & Community Services at Truckee Tahoe Airport District will share with us his knowledge and advice to make sure our experience flying to Lake Tahoe is a positive and safe one.

Directions: For those driving, there will be parking spaces at the venue.

If you intend on flying, Signature Aviation located North of 28R will provide transient parking.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
