

## Emergency Procedures Training

While in flight emergencies are rare, if one is improperly handled the results can be catastrophic. In this seminar we will discuss some of the basic techniques that both the military and the airlines teach their pilots for coping with emergencies in flight and their applicability to General Aviation flying. Specifically we will cover the 4 steps that need to be performed in any aircraft emergency, describe techniques for properly handling different types of in flight emergencies and discuss resources that can reduce risk during an in flight emergency. Case studies will be used to highlight proper and improper task prioritization during actual emergency situations. This was a March Topic of the Month.

**Directions:** Seminar Will Meet at Five Rivers Aviation, 700 Terminal Circle, Livermore, CA 94551

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
