

## Maneuvering Flight

Over the past ten years approximately 65% of GA accidents have occurred during maneuvering flight. Maneuvering flight is defined as flight below 1000 feet AGL, flight involving steep turns and aerobatic flight. In this seminar we will discuss the aerodynamics of maneuvering flight and how to mitigate risk through an understanding of the aerodynamic and structural limitations of our aircraft. In addition we will discuss some techniques for minimizing risk during maneuvering flight.

**Directions:** Main classroom at Five Rivers Aviation

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.

### Event Details

**Tue, Aug 28, 2018 - 19:00 PDT**  
**Five Rivers Aviation (Livermore**  
**Airport [KLVK])**

700 Terminal Circle  
Livermore, CA 94551
